

LARNE PORT

Notice to Mariner's 05/2025

Water Injection Dredging Larne Port

Following a hydrographic survey of the Port and its approaches on 01st May 2025, the Port will carry out a maintenance dredge within the Larne Harbour Limits starting on the 15/08/2025 for approximately 22 days.

Workboat MELWAY will be working in the Port Limits and will be injection dredging on the EBB tide from HW to LW each day. Due to the water injection there will be a discoloration of the water during this time, as the injected material is carried out with the outgoing tide.

MELWAY will be on VHF CH 11 and 16 with Larne Port Control coordinating dredge movements.

This notice is self cancelling when works are complete.

Thomas McKay
Harbour Master
